Brisbane (Qld.). City Council

Cities of Culture Deborah Stevenson, 2013-08-15 Culture now has a prominent place on the urban policy and re-profiling agendas of cities around the world. City-based cultural planning emphasising creativity in all its guises has emerged as a significant local policy initiative, while the notion of the 'creative city' has become an urban imaging cliché. The proliferation of local blueprints for cultural planning/creative cities has been remarkable, while supra-state bodies such as the European Union and UNESCO are also fostering the use of culture in strategies to revive cities and urban economies and to brand places as 'different'. Cities of Culture highlights significant trends in cultural planning since its inception, revealing and analysing key discourses and influential (globally-circulating) manifestos and processes, as well as their interpretation and implementation in specific places. With reference to examples drawn from Europe, Australia, Asia and North America, Cities of Culture provides insights into the application of urban cultural strategies in different local, national and international contexts, highlighting regularities, tensions and intersections as well as core underpinning assumptions. This book explores the now-pervasive expectation that cultural planning is capable of achieving a wide range of social, economic, urban and creative outcomes. It will be of interest for students and scholars of urban sociology, urban studies, cultural policy studies and human geography.

This fourth edition has been updated to include recent changes in nomenclature, bringing all species and genus names in line with the current Australian Plant Census. Beautifully illustrated, this guide is for anyone interested in the identification of pest plants and the preservation of our native flora. Handbook of Flood Risk Management and Community Action Divine Kwaku Ahadzie, David Proverbs, Robby Soetanto, Victor Oluwasina Oladokun, 2023-12-08 Recurring and worsening flood incidence around the world has necessitated the understanding and strengthening of community-based flood risk management from an international perspective. This handbook emphasises the need for community action as part of an integrated flood risk management approach, highlighting

case studies that have received recognition and made positive impacts, resulting in resilience-enhancing actions which can improve global community understanding. The content has been arranged such that it covers flood risk management approaches in the three main interfaces of before, during and after the flood event. Experts writing on case studies from Africa, Oceania, Europe, Asia and the Americas come together to present lessons from regional and continental experiences that will be useful in providing an understanding of the nature and effectiveness of the human-centred approach. The successful implementation of local and scientific knowledge as complementary measures is also highlighted in a systematic review on the use of technologies for flood risk reduction. This interesting and diverse range of contributions seeks to showcase opportunities for cross-cultural knowledge transfer and uptake in the field of flood risk management. This handbook is essential reading for researchers, policy makers and leaders involved in flood and disaster management in the built environment, risk assessment, environmental and civil/construction engineering and community action planning.

Berleur, Magda David Hercheui, Lorenz Hilty, 2010-08-23 The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20-23) organised by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International Conference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

web complete the nuclear equation to find the atomic number of californium $^{242}_{96}\text{Cf} \rightarrow ^{238}_{94}\text{Pu} + ^4_2\text{He}$ by firing heavier particles such as carbon or boron ions at the target materials heavier elements can be synthesised

nuclear equations chemistry socratic - May 04 2023

web nuclear equations represent the reactants and products

in radioactive decay nuclear fission or nuclear fusion instead of chemical equations where it shows the different number of elements is conserved in a reaction in a nuclear reaction the atomic mass and proton number are conserved
