introduction to differential geometry eth z - Apr 11 2023

web these are notes for the lecture course differential geometry i given by the second author at eth zurich in the fall semester 2017 they are based on a lecture course¹ given by the first author at the university of wisconsin madison in the fall semester 1983 one can distinguish extrinsic differential geometry and intrinsic differential geometry

contents this course is devoted to differentiable manifolds we
begin by studying their differentiable functions maps and the
rank theorem

bundles as taught e g in the differential geometry i course
during the fall semester 2015 contents in this course we will
define riemannian metrics on smooth manifolds and use
them to study geodesics we also study derivatives of vector
fields with respect to each other leading to the notion of
connection
