The First Impulse Laurel Fantauzzo, 2017-10-20 The First Impulse is about the still-unsolved murder of Filipino-Canadian film critic Alexis Tioseco and his girlfriend, Slovenian film critic and magazine editor Nika Bohinc, as retold by Laurel Fantauzzo. This book recounts the love and life of Alexis and Nika, the circumstances surrounding their murder in September 2009, the investigations, and what happened for the people related to the couple before and after the incident, aside from some commentary on the Philippine film industry.

Old Sparky Anthony Galvin, 2016-10-18 A shocking exploration of America's preferred method of capital punishment. In early 2013, Robert Gleason became the latest victim of the electric chair, a peculiarly American execution method. Shouting Póg mo thóin ("Kiss my ass" in Gaelic), he grinned as electricity shot through his system. When the current was switched off, his body slumped against the leather restraints, and Gleason, who had strangled two fellow inmates to ensure his execution was not postponed, was dead. The execution had gone flawlessly—not a guaranteed result with the electric chair, which has gone horrifically wrong on many occasions. Old Sparky covers the history of capital punishment in America and the "current wars" between Edison and Westinghouse that led to the development of the electric chair. It examines how the electric chair became the most popular method of execution in America before being superseded by lethal injection. Famous executions are explored, alongside quirky last meals and poignant last words. The death penalty remains a hot topic of debate in America, and Old Sparky does not shy away from that controversy. Executions have gone spectacularly wrong, with convicts being set alight or needing up to five jolts of electricity before dying. There have been terrible miscarriages of justice, and the death penalty has not been applied even-handedly. Historically, African Americans, the mentally challenged, and poor defendants have been likely to get the chair, an anomaly which led the Supreme Court to briefly suspend the death penalty. Since the resumption of capital punishment in 1976, Texas alone has executed more than five hundred prisoners, and death row is full. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to

books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The Next Frontier David T Johnson, Franklin E Zimring, 2009-02-02 Today, two-thirds of the world's nations have abolished the death penalty, either officially or in practice, due mainly to the campaign to end state executions led by Western European nations. Will this success spread to Asia, where over 95 percent of executions now occur? Do Asian values and traditions support capital punishment, or will development and democratization end executions in the world's most rapidly developing region? David T. Johnson, an expert on law and society in Asia, and Franklin E. Zimring, a senior authority on capital punishment, combine detailed case studies of the death penalty in Asian nations with cross-national comparisons to identify the critical factors for the future of Asian death penalty policy. The clear trend is away from reliance on state execution and many nations with death penalties in their criminal codes rarely use it. Only the hard-line authoritarian regimes of China, Vietnam, Singapore, and North Korea execute with any frequency, and when authoritarian states experience democratic reforms, the rate of executions drops sharply, as in Taiwan and South Korea. Debunking the myth of Asian values, Johnson and Zimring demonstrate that politics, rather than culture or tradition, is the major obstacle to the end of executions. Carefully researched and full of valuable lessons, *The Next Frontier* is the authoritative resource on the death penalty in Asia for scholars, policymakers, and advocates around the world.

Parlade Family Memoir Bob Parlade, 2013-07 Who were your forbears? What sort of humans were we? What kind of world have we moved about? How as a family have we lived and how have we interacted with people around us? The contents of this book will very likely be of immense value to two or more generations down the line, specifically the grandchildren of our grandchildren, in the same manner as I, at this moment, would pay a price to see and learn how our forbears of past two or more generations lived within the context indicated above.

The Grand Archon Norbert Mercado, Norberto Mercado, 2017-10-19 “A Sigma Rhoan should believe in the existence of the Almighty God who created this earth and the whole universe. If he does not believe in God, to me, he is not a true Sigma Rhoan,” Attorney George Briones firmly stressed to his brothers, or brods for short, with his oratorical voice his conviction of what a true Sigma Rhoan is. The founders of the UP Sigma Rho Fraternity were patriotic students of the University of the Philippines in Manila. They were also deeply religious, and their faith in God, coupled with their patriotic spirit, served as

their guiding principles in organizing the UP Sigma Rho in 1938 – three years before the Japanese invasion of the Philippines. The founders of the fraternity were all students of the UP College of Law which was then based in Padre Faura in Manila.

A brief History of Great Inventions Dr. P. D. Hegde, 2021-09-09 An invention is a unique or novel device, method, composition or process. It may be an improvement upon a machine or product or a new process for creating an object or a result. An invention that achieves a completely unique function or result may be a radical breakthrough. Some inventions can be patented. A Patent legally protects the intellectual property rights of the inventor and legally recognizes that a claimed invention is actually an invention. The rules and requirements for patenting an invention vary from country to country, and the process of obtaining a patent is often expensive.
