web a battery charger circuit is a device used to put energy
into a secondary cell or rechargeable battery by forcing an
electric current through it the charging protocol is
determined by the size and type of the charged battery

web feb 26 2022 feature the project is the nimh battery
charger circuit with automatic cutoff when fully charged you
can charge the batteries from 2-8 pcs depending on an input
voltage in the circuit has two led indicators first led show
charging status when the battery is full it will be off second
led connect the battery correctly

web may 14 2022 the main reason for using a float charger
is that it protects the battery from overcharging and deep
discharging thus you can connect the float charger circuit to
a battery for indefinite intervals of time i.e. there is no need
to disconnect the charger circuit from the battery
