**A History of Travel in 50 Vehicles** Paula Grey, 2016-09-06 Paula Grey explores how creative thinkers—collaborating or competing and always building on the work of their predecessors—have envisioned new ways to move about in the world. The story of travel is the human story. From the first migrations out of Africa on weary feet to horses, camels, rafts, chariots, steamships, trains, hot air balloons, cars, submarines, and moon rockets, humans have combined imagination, daring, and technical brilliance to create new vehicles and improve existing ones. Geography and culture have influenced the development of vehicles in far-flung parts of the world, and human travel has, in turn, exerted a profound influence on society and the environment. Whether escaping deprivation, pestilence, persecution, oppression, or fear—or seeking abundance, freedom, fame, fortune, or a fresh start—we have always been a traveling species, and it seems we always will be. Here is the story of humankind's restless impulse to see what's over the next ridge, beyond the next sunrise, on the next planet. Enjoy the journey! Fountas & Pinnell Level Z+

International Encyclopedia of Transportation ,2021-05-13 In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction; this is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts. This has become particularly acute with the impact that Covid-19 has had on transportation across the world, at local, national and international levels. Encyclopedia of Transportation, Seven Volume Set - containing almost 600 articles - brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering, operations research, economics, geography and sociology in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes, but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world and different social perspectives. The nine sections are structured around the following themes: Transport Modes; Freight Transport and Logistics; Transport Safety and Security; Transport Economics; Traffic Management; Transport Modelling and Data Management; Transport Policy and Planning; Transport Psychology;

Sustainability and Health Issues in Transportation. Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future-oriented view of new research areas or challenges. The end result is a reference work that offers researchers and practitioners new approaches, new ways of thinking and novel solutions to problems. All-encompassing and expertly authored, this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world. Provides a forward looking and integrated approach to transportation Updated with future technological impacts, such as self-driving vehicles, cyber-physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach, including sets of comparative studies and applications

*Responsibility and Accountability in Maritime Law* Simon Daniels, 2022-04-04 The criminalisation of seafarers has been observed as a growing phenomenon for more than forty years, presenting a picture of increasing liability upon the Master even though their responsibilities remain essentially unchanged in generations of maritime law. Because of the demand by society to find someone to blame for environmental and human loss, there is a constant flow of cases, which serve to confirm the phenomenon but offer no solutions to defend the innocent. The structure of the maritime environment in which they work has changed dramatically, as evidenced by the complex evolution of fleet ownership and management, leaving the Master with diminished management influence. This book has been written in a format which meets the needs of lawyers, academics and maritime professionals, with the aim to analyse the character of criminalisation to determine the features which characterise the phenomenon in Port and Flag State contexts; it interrogates the aim to define the nature of criminalisation and identifies the constituent problems in such criminal accountability. Each chapter relies heavily on case studies to illustrate how the laws which reflect national policy underpinning those priorities are applied in practice. This structure enables an understanding of the problems in the criminal process, with a view to offering options for solutions. The book is directly relevant to a broad range of parties which includes lawyers, academics, P & I clubs, seafarers, shipowners, managers and agents, and national and international seafaring unions.

**People, Places, and Belonging** William Marsiglio, 2025-01-31 Place matters – for good and bad. Infinitely diverse in form, place embodies the action settings where social life happens. Often fighting to preserve a sense of group belonging in the process, we design places to reflect our values and interests. With an eye on our rapidly changing world, *People, Places, and Belonging* explores how social realities at every level are affected by the places we collectively forge across various social domains. The book shows how place-related circumstances can promote personal empowerment, civic engagement, and social and environmental justice. Discussing places that affect personal and social well-being, including homes, communities, vehicles, and the metaverse, William Marsiglio illustrates how a web of social processes involving claims, attachments, rituals, and transitions (CART) structure our experiences in place. The author argues that we can use decision-

making principles to enhance our attachments, encourage supportive rituals, smooth out transitions, and manage claims with less conflict and more social justice. Armed with a heightened place consciousness and ethical principles, *People, Places, and Belonging* ultimately posits that we must individually and collectively build places that enrich our lives, celebrate the communal spirit, and foster social equity and ecological justice.

**The Girl with the Sturgeon Tattoo** Lars Arffssen,2011-08-30 Arguably the funniest novel to emerge from Northern Europe since the Black Death A reindeer strangler has struck again; the world's leading authority on Baltic sturgeon has been filleted, and the head of Sweden's only unpublished thriller writer has been discovered some meters from his body. Just a typical day in Stockholm's crime log? Or are the murders the works of a single killer? Chief Inspector Svenjamin Bubbles has a suspect: Lizzy Salamander, Scandinavia's most heavily tattooed girl-sociopath and hacker extraordinaire. Mikael Blomberg believes Salamander has been framed. But if Salamander is innocent, who is the 4'10 girl ninja captured on a surveillance camera decapitating the failed novelist? And what has become of the unpublished manuscript that claimed to connect Sweden's most eco-friendly corporations to the twentieth century's greatest tyrant? A shocking story of corruption and perversion that reaches to the highest echelons of the world's largest producer of inexpensive ready-to-assemble wooden bookcases, *The Girl with the Sturgeon Tattoo* delivers a hilarious—and gripping—parody of the best-selling novels by Stieg Larsson.

**Port Economics** Wayne K. Talley,2017-12-15 Port Economics is the study of the economic decisions (and their consequences) of the users and providers of port services. A port works as an engine for economic development. This book provides a detailed discussion of port freight service users, such as freight water and land carriers, that have their ships and vehicles serviced and their cargoes unloaded by ports, as well as passenger services such as ferry carriers which are serviced by ferry passenger ports. This text continues to enhance our understanding of port economics by exploring the economic theories, supply and demand curves, and the actual and opportunity costs relating to the carriers, shippers and passengers

who use ports. This new edition has been updated throughout. This includes: An expanded discussion of container, break-bulk, dry-bulk, liquid-bulk and neo-bulk ports; An introduction of port service chains, hinterland transport chains, maritime transport chains and port multi-service congestion; A discussion of seaborne trade, dry ports, port centrality and connectivity and free trade zones. This updated and comprehensive introduction to port economics will be of benefit to students and researchers in their study of port economics and management. It is also of great importance to professionals who manage and operate ports as well as freight and passenger carriers.

Cruising for Trouble Mark Gaouette, 2010-03-19 This book offers an alarming inside look at the security preparations of the cruise industry and the potential for cruise ships to be the target for pirates, terrorists, and criminal activity. Cruising for Trouble exposes the acute vulnerability of cruise ships to piracy, terrorism, and crime, both on the high seas and in domestic and foreign ports-of-call. While cruise ships have ramped up in size and passenger capacity to become floating skyscrapers housing as many as 7,000 passengers, and while piracy incidents have increased since 2008 as the world economy has deteriorated, there has been no corresponding increase or enhancement in onboard security personnel, external tactical units, preventive screening, or coordinated response planning to guard against the growing threat of acts of piracy and internal and external terrorist attacks. Commander Gaouette reveals to cruise passengers the very real security dangers they unwittingly face when they saunter up the gangway of a cruise ship for a carefree holiday. He sounds a clarion call to national and transnational security agencies, maritime regulators, legislators, and customers to compel the cruise industry to strengthen and reform its security programs before catastrophe strikes. The author, a longtime cruise industry insider who now serves as a top maritime security official in the Department of Homeland Security, details the many security defects and vulnerabilities of cruise ships, identifies the remedies, and makes the case for their urgent implementation. Extensively documented and illustrated, Cruising for Trouble is a vividly told cautionary for the ten million Americans who taken cruise-ship vacations each year and the millions more who would like to. As well as modeling the potential threats to cruise ships from pirates and maritime terrorists—who mimic each other's methods, overlap each other's territories, and might well find it mutually beneficial to combine their forces and resources—Commander Gaoutte recounts many actual examples of cruise-ship insecurity that have been swept under the carpet or spun by the cruise industry: pirate attacks, fires, onboard crime, mass food poisonings and infections, and the mysterious disappearances of cruise-ship passengers.

Captain F. Spiess and the German Meteor Expedition of 1925-27 William J. Emery, Walter Zenk, 2019-08-01 Banned from taking naval vessels to foreign ports after WW1 Germany undertakes a comprehensive oceanographic expedition to the

Atlantic Ocean to test many new measurement systems and to establish the long term circulation patterns of the Atlantic. Challenged by the proscription on German naval vessels from visiting foreign ports after WW1 a group of German oceanographers from the Institute for Marine Sciences in Berlin carried out a pioneering research expedition from 1925-27 to sample the hydrographic structure of the South Atlantic Ocean. Its captain Fritz Spiess was the primary driving force behind the expedition and the German navy supplied the survey ship Meteor. During this 2.5 year expedition the Meteor scientists tested a great many new measurement systems many of which later became routine oceanographic measurement systems. As a result of their observations the mean circulation pattern of the Atlantic was revealed that has remained valid to this day. People interested in the history of ocean exploration, the history of Earth science and German scientific activity between the World Wars will find this volume to be an intriguing read. Much of the book has been taken from the original cruise report written by Captain Fritz Spiess (1933). In addition, his role has been expanded to demonstrate his essential contribution to the creation of the expedition, its execution and the dissemination of its results upon completion. The present text comments on the captain's life before and after the expedition. In 1934 Fritz Spiess started his second career as President of the German Marine Observatory (Deutsche Seewarte) in Hamburg. A great number of so far unpublished documents demonstrate Spiess's ability to run his dignified agency in the turbulent times of Nazi Germany without becoming a Nazi himself. Readers will learn how this first ocean expedition, dedicated to the study of the physics a whole ocean basin, helped to provide the background for modern physical oceanography.
