36 Love Stories: A unique collection of stereotype breaking tales of passion Himanshu Ranjan, 2019-01-17 36 Love Stories is an attempt to break the stereotypes that cluster around the emotion called love. To ponder more on such questions - let's embark on a journey to discover the infiniteness of love contained in our finite passionate tales.

Love and the Genders Erik von Kuehnelt-Leddihn, 2019-12-13 Love and the Genders deals with the four forms of love: Eros (the love between the sexes), the affections (between family members), friendship (with the accent between the sexes), and charity. This scholarly book (60% elaborate footnotes) is based on the author's German book Das Rätsel Liebe (The Enigma of Love) (Vienna, Herold, 1975). All forms of love tend toward union. (The rapist does not love, and masturbation needs no partner.) The book has profound cultural and even political implications. What are the qualities and qualifications of the sexes, their identities, and specific roles? Men are not superior to women and vice versa, but they are radically different, and the biological research in recent years has made a number of discoveries. We only know since 1958 for certain that every cell in the male body carries an additional element (the Y), but brain research has proven that the sexual differences are not only hormonal (known for a long time) but are also in the brain. Thus men and women are in no way interchangeable. They are not made to compete. Their differences are rather statistical than personal, and there are situations in which they can or must substitute for each other. Thus, queens might have to rule and men might have occasionally to tend babies (although they cannot nurse them). A high culture is ordered such that the sexes (genders) might get their fulfillment, and, naturally, they must feel affection for each other. The point of view of this book is Christian (which includes a Hebrew background). It is not specifically Catholic and does not deal directly with sexual ethics. (Contraception is a sexual problem; abortion is obviously plain murder.) Homosexuality is mentioned a bit more broadly. Misandry and misogyny are referenced in the North American and European situation. Friendship (not sex or Eros) is the most important element in marriage. (If one marries, can the partner be a friend for a lifetime? Fidelity belongs psychologically to friendship, not to Eros or sex.) What about the political aspect of the love (the interest, the enthusiasm) for otherness? Leftists are identitarians. This book with its scope and documentation is quite unique. It deals basically with the crisis of our time and age.

The Nature of Love, Volume 2 Irving Singer,2009-02-20 An examination of ideas and ideals of medieval courtly love and the transition into later Romantic love, analyzing the work of Dante, Shakespeare, and Schopenhauer, among many

others. Review), monumental (Boston Globe), one of the major works of philosophy in our century (Nous), wise and magisterial (Times Literary Supplement), and a masterpiece of critical thinking [that] is a timely, eloquent, and scrupulous account of what, after all, still makes the world go round (Christian Science Monitor). In the second volume, Singer studies the ideas and ideals of medieval courtly love and nineteenth-century Romantic love, as well as the transition between these two perspectives. According to the traditions of courtly love in the twelfth century and thereafter, not only God but also human beings in themselves are capable of authentic love. The pursuit of love between man and woman was seen as a splendid ideal that ennobles both the lover and the beloved. It was something more than libidinal sexuality and involved sophisticated and highly refined courtliness that emulated religious love in its ability to create a holy union between the participants. Adherents to Romantic love in later centuries, affirmed the capacity of love to effect a merging between two people who thus became one. Singer analyzes the transition from courtly to Romantic by reference to the writings of many artists beginning with Dante and ending with Richard Wagner, as well as Neoplatonist philosophers of the Italian Renaissance, Descartes, Spinoza, Rousseau, Hume, Kant, Hegel, and Schopenhauer. In relation to romanticism itself, he distinguishes between two aspects—benign romanticism and Romantic pessimism—that took on renewed importance in the twentieth century.
