Epic Journey James W. Ceaser,2011-03-16 Noted campaign scholars James W. Ceaser, Andrew E. Busch, and John J. Pitney Jr. take readers along on the longest, most expensive, and in many ways most dramatic presidential campaign in American history. Drawing on their extensive knowledge of political history and deep resources of current political science, the authors capture the astonishing twists of fate, uncanny detours, and remarkable surprises that made the 2008 election truly historic. With President George W. Bush's approval ratings at record lows, the 2008 election was a contest that Democrats were predicted to win. And with Barack Obama's victory over John McCain, they did. But it was the highly unlikely journey to this likely destination that set this presidential election apart from others. As they have every four years since 1992, James W. Ceaser and Andrew E. Busch once again provide the most comprehensive and authoritative account of the presidential election. Joined on this book by John J. Pitney Jr., the authors chronicle the epic journey—culminating in the election of the first African American president—of a group of extraordinary candidates and a nation. God Less America Todd Starnes,2014-05-06 Pay attention, people of faith. Dark clouds are gathering. The winds of intolerance are blowing. There's a great storm approaching. American Christians are facing uncertain times. Our nation's values are under assault. Religious liberty has been undermined. We live in a day when right is now wrong and wrong is now right. The vicious leftwing attack against the recent traditional marriage stance of Chick-fil-A should serve as a wakeup call to people of faith. It's not about a chicken sandwich. It's about religious liberty. It's about free speech. It's about the future of our nation. As a reporter covering the culture war for FOX News, Todd Starnes is on the front lines of these attacks against traditional values. In *God Less America*, he uses both recent news stories and compelling interviews with today's top conservative leaders to bring to light what is happening across our country. In his award-winning, satire-meets-serious writing style, he strikes an important blow in today's culture wars.

Building Schools, Making Doctors Katherine L. Carroll, 2022-05-31 In the late nineteenth century, medical educators intent on transforming American physicians into scientifically trained, elite professionals recognized the value of medical school design for their reform efforts. Between 1893 and 1940, nearly every medical college in the country rebuilt or substantially renovated its facility. In *Building Schools, Making Doctors*, Katherine Carroll reveals how the schools constructed during this fifty-year period did more than passively house a remodeled system of medical training; they actively participated in defining and promoting an innovative pedagogy, modern science, and the new physician. Interdisciplinary and wide ranging, her study moves architecture from the periphery of medical education to the center, uncovering a network of medical educators, architects, and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became. Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings, the influence of the schools' donors and architects, the impact of the structures on the urban landscape and the local community, and the facilities' privileging of white men within the medical profession during this formative period for physicians and medical schools.

Shirley Jackson Bernice M. Murphy,2005-10-19 Shirley Jackson was one of America's most prominent female writers of the 1950s. Between 1948 and 1965 she published six novels, one best-selling story collection, two popular volumes of her family chronicles and many stories, which ranged from fairly conventional tales for the women's magazine market to the ambiguous, allusive, delicately sinister and more obviously literary stories that were closest to Jackson's heart and destined to end up in the more highbrow end of the market. Most critical discussions of Jackson tend to focus on *The Lottery* and *The Haunting of Hill House*. An author of such accomplishment--and one so fully engaged with the pressures and preoccupations of postwar America--merits fuller discussion. To that end, this collection of essays widens the scope of Jackson scholarship with new writing on such works as *The Road through the Wall* and *We Have Always Lived in the Castle*, and topics ranging from Jackson's domestic fiction to ethics, cosmology, and eschatology. The book also makes newly available some of the most significant Jackson scholarship published in the last two decades.

The Civil War Soldier - His Personal Items Robert Jones,2014-05-10 The personal objects left behind by the Civil War soldier are small windows which allow us to get a brief glimpse into the most momentous part of his life ... In today's 'world of disposable goods', who would take the time to meticulously inscribe their name or initials in such an inanimate object as a razor or soap dish. We may think it was done to prove ownership, maybe it could identify him if killed or wounded, or maybe it was just out of boredom ... The soldier knew the war would be scrupulously studied by future generations. Not being General Grant or Lee, he would have to settle for a less significant role to say 'I was there -- I was a part of this'. Many of these veterans carefully packed away their menial possessions as a personal time capsule, hoping that someone in the future would find them and if only for a brief moment, remember their small part in American history--Back cover

Stalking the Healthful Herbs Euell Gibbons,2020-03-23 Having written the enormously popular *Stalking the Wild Asparagus* and *Stalking the Blue-Eyed Scallop*, Euell Gibbons turned his attention to the wealth of herbs that grow wild throughout North America. Combining the skills he learned as a boy with Indian lore and his years of patient experimentation, he wrote this book that others might enjoy the benefits of our little-known natural heritage. Euell Gibbons shows the reader how to enjoy the culinary and medicinal virtues of herbs and wild plants. Drawn from the author's wide knowledge of plants as well as from the lore of Native Americans and early settlers, the information is supplemented by nutritionists at Pennsylvania State University who worked with Gibbons on analysis of the entries.
