Carey McWilliams

Factories in the Field Carey McWilliams, 2000-04-15 Dramatizing the misery of the dust bowl migrants hoping to find work in California agriculture, this text starts with the scandals of the Spanish land grant purchases, and goes on to examine the experience of ethnic groups that have provided labour for California's agricultural industry.

Robotics and Factories of the Future '87 R. Radharamanan, 2012-12-06 The papers presented at the Second International Conference on Robotics and Factories of the Future held in San Diego, California, USA during July 28-31, 1987 are compiled in this volume. Over two hundred participants attended the conference, made technical presentations and discussed about various aspects of manufacturing, robotics and factories of the future. The number of papers published in this volume and the number of unpublished presentations at the conference indicates the evidence of growing interest in the areas of CAD/CAM, robotics and their role in future factories. The conference consisted of five plenary sessions, twenty three technical sessions, workshops, and exhibits from local industries and educational institutions. I wish to acknowledge with many thanks the contributions of all the authors who presented their work at the conference and submitted the manuscripts for publication. It is also my pleasure to acknowledge the role of keynote, banquet, and plenary sessions speakers whose contributions added greatly to the success of the conference. My sincere thanks to all session chairmen. I wish that the series of the International Conferences on Robotics and Factories of the Future which was initiated in 1984 in Charlotte, North Carolina will have a major impact on the use of robots and computers in the automated factories of the future.

Modeling, Simulation, And Control Of Flexible Manufacturing Systems: A Petri Net Approach Kurapati

Venkatesh,Mengchu Zhou,1999-01-29 One critical barrier leading to successful implementation of flexible manufacturing and related automated systems is the ever-increasing complexity of their modeling, analysis, simulation, and control. Research and development over the last three decades has provided new theory and graphical tools based on Petri nets and related concepts for the design of such systems. The purpose of this book is to introduce a set of Petri-net-based tools and methods to address a variety of problems associated with the design and implementation of flexible manufacturing systems (FMSs), with several implementation examples. There are three ways this book will directly benefit readers. First, the book will allow engineers and managers who are responsible for the design and implementation of modern manufacturing systems to evaluate Petri nets for applications in their work. Second, it will provide sufficient breadth and depth to allow development of Petri-net-based industrial applications. Third, it will allow the basic Petri net material to be taught to industrial practitioners, students, and academic researchers much more efficiently. This will foster further research and applications of Petri nets in aiding the successful implementation of advanced manufacturing systems.

Rival Partners Jieh-min Wu,2023-11-20 Taiwan has been depicted as an island facing the incessant threat of forcible unification with the People's Republic of China. Why, then, has Taiwan spent more than three decades pouring capital and talent into China? In award-winning *Rival Partners*, Wu Jieh-min follows the development of Taiwanese enterprises in China over twenty-five years and provides fresh insights. The geopolitical shift in Asia beginning in the 1970s and the global restructuring of value chains since the 1980s created strong incentives for Taiwanese entrepreneurs to rush into China

despite high political risks and insecure property rights. Taiwanese investment, in conjunction with Hong Kong capital, laid the foundation for the world's factory to flourish in the southern province of Guangdong, but official Chinese narratives play down Taiwan's vital contribution. It is hard to imagine the Guangdong model without Taiwanese investment, and, without the Guangdong model, China's rise could not have occurred. Going beyond the received wisdom of the "China miracle" and "Taiwan factor," Wu delineates how Taiwanese business people, with the cooperation of local officials, ushered global capitalism into China. By partnering with its political archrival, Taiwan has benefited enormously, while helping to cultivate an economic superpower that increasingly exerts its influence around the world.

Industrial Intelligence: Methods and Applications Tianyuan Liu, Jinsong Bao, Yu Zheng, Yuqian Lu, 2025-02-03 This book explains the AI algorithms, techniques, and application methods used in manufacturing, and how they contribute to the advancement of industrial intelligence. Industrial artificial intelligence (IAI) is rapidly evolving alongside the development of smart manufacturing, which cannot be achieved without intelligence at its core. IAI enables intelligent and resilient manufacturing systems, making them fault-tolerant, on-demand, and self-organizing. It also provides on-demand manufacturing services to end users by optimally coordinating distributed manufacturing resources, augmented by AI methodologies. This book will be of interest to researchers and professionals in the manufacturing industry.

Flexible Automation and Intelligent Manufacturing: Manufacturing Innovation and Preparedness for the Changing World Order Yi-Chi Wang, Siu Hang Chan, Zih-Huei Wang, 2024-12-08 This book reports on cutting-edge research and developments in manufacturing, giving a special emphasis to solutions for the Changing World Order. It covers applications of machine learning in manufacturing and advances in cyber-physical systems, human-robot collaboration, and machine tools and assembly systems. It also reports on advances in logistics and supply chain, and lean manufacturing. Based on the proceedings of the 33rd International Conference on Flexible Automation and Intelligent Manufacturing (FAIM2024), held on June 23-26, 2024, in Taichung, Taiwan, this first volume of a 2-volume set provides academics and professionals with extensive, technical information on trends and technologies in manufacturing, yet it also discusses challenges and practice-oriented experience in all the above-mentioned areas.
