A Textbook of Biotechnology Dubey R.C., 2022 Fifth Revised Edition 2014 FOR UNIVERSITY & COLLEGE STUDENTS IN INDIA & ABROAD Due to expanding horizon of biotechnology, it was difficult to accommodate the current information of biotechnology in detail. Therefore, a separate book entitled Advanced Biotechnology has been written for the Postgraduate students of Indian University and Colleges. Therefore, the present form of A Textbook of Biotechnology is totally useful for undergraduate students. A separate section of Probiotics has been added in Chapter 18. Chapter 27 on Experiments on Biotechnology has been deleted from the book because most of the experiments have been written in 'Practical Microbiology' by R.C. Dubey and D.K. Maheshwari. Bibliography has been added to help the students for further consultation of resource materials.

Modern Industrial Microbiology and Biotechnology Nduka Okafor,Benedict C. Okeke,2017-11-22 The field of industrial microbiology involves a thorough knowledge of the microbial physiology behind the processes in the large-scale, profit-oriented production of microbe-related goods which are the subject of the field. In recent times a paradigm shift has occurred, and a molecular understanding of the various processes by which plants, animals and microorganisms are manipulated is now central to industrial microbiology. Thus the various applications of industrial microbiology are covered broadly, with emphasis on the physiological and genomic principles behind these applications. Relevance of the new elements such as bioinformatics, genomics, proteomics, site-directed mutation and metabolic engineering, which have necessitated the paradigm shift in industrial microbiology are discussed.

Single Cell Protein Israel Goldberg,2013-03-13 In early 1973, I returned to Israel from a post-doctoral fellowship at Harvard University, and was accepted as a lecturer in the Department of Applied Microbiology at the Hebrew University of Jerusalem. Shortly after my return, Professor Richard Mateles, who at that time was head of the Department, suggested that I purchase a good and comprehensive book on single cell protein (SCP) in order to expand my general knowledge in the subject I had started then to work on; that was microbial utilization of one-carbon (C) compounds. I Naturally, I took his advice (after all, he was the Boss) and bought the book, which was the only general book published on this subject at that time, and was based on papers presented at the First International Conference on Single Cell Protein, held at the Massachusetts Institute of Technology (M.I.T.), on October 1967 (Mateles and Tannenbaum, editors) [1]. Through this book I became acquainted with the world's hunger problem that existed in the past, and ways in which it was to be solved by SCP products prepared from CO , fossil-based raw 2 materials, and from wastes.

Cellular Agriculture Dilek Ercili-Cura, Dorothee Barth, 2021-03-16 Cellular agriculture, also called lab-grown food, promises to provide alternative food options to current agriculture practices. Cellular agriculture is food grown in laboratories and bioreactors rather than on fields, relying on cultivation of cells under controlled conditions, with minimal use of natural resources and lower greenhouse gas emission costs than in traditional practices. It gives us the prospect of consuming the same foods such as a dairy ice cream or a burger. And it can further broaden the variety of textures, flavors, nutrition, and health-promoting aspects that food can deliver. Cellular Agriculture: Lab-Grown Foods gives an overview of the broad range of approaches to cellular agriculture, the current state of scale and regulations, and the results it brings about in terms of environmental footprint and consumer attitudes. Cellular Agriculture: Lab-Grown Foods was organized by Solar Foods, a food-tech company that develops a cell-based food protein produced from CO₂ and electricity. A fruitful collaboration with VTT Technical Research Center of Finland Ltd allowed conceptualizing and streamlining of the written and visual content in the book.
