web jun 16 2022 let us quickly go over  
the most basic classification we already  
saw the distinction between ordinary  
and partial differential equations  
ordinary differential equations or ode  
are equations where the derivatives are  
taken with respect to only one variable  
that is there is only one independent  
variable partial differential equations

partial differential equation involves several partial derivatives over several variables in a multivariate context e.g.  $\frac{dz}{dx}$  vs  $\frac{dz}{dx}$  and  $\frac{dz}{dx}$  vs  $\frac{dz}{dx}$

partial differential equations it contains different methods of solving ordinary differential equations of first order and higher degree it gives the solution methodology for linear differential equations with constant and variable coefficients and linear differential equations of second
