Urban Growth and Spatial Transition in Nepal Elisa Muzzini, Gabriela Aparicio, 2013-04-02 This book carries out an initial assessment of Nepal's urban growth and spatial transformation, with a focus on spatial demographic and economic trends, economic growth drivers and infrastructure requirements of Nepal's urban regions.

Urban food system and nutrition assessment in Kathmandu, Nepal Raza, A., Pandey, H., Lobo, A.S., Ganpule-Rao, A., 2022-03-15 This report is an outcome of the Urban Food System Assessments for Nutrition (UFSAN) project of the Food and Agriculture Organization of the United Nations (FAO). The objectives of the UFSAN project were to: develop and pilot a holistic tool to assess nutrition and food systems in urban areas, with the aim to guide policies, programmes and investments towards a range of potential food system actions that promote better nutrition and healthy diets; pilot the tool in four cities: Ahmedabad and Pune, in India, and Pokhara and Kathmandu, in Nepal; and disseminate the findings of the UFSAN tool among nutrition and food systems stakeholders in these cities.

Urban Development in Asia and Africa Yuji Murayama, Courage Kamusoko, Akio Yamashita, Ronald C. Estoque, 2017-03-29 This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography. State-of-the-art geospatial tools and techniques, including geographic information system/science and remote sensing, were used to facilitate the analysis. In addition to the empirical results, the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis, e.g. land-change modeling for improving our understanding of the trends and patterns of urban growth in Asia and Africa. Furthermore, given the complexity of the urban growth process across the world, issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions. This book is written for researchers, academicians, practitioners, and graduate students. The inclusion of the origin and brief history of each of the selected metropolitan regions, including the analysis of their urban primacy, spatiotemporal patterns of urban land-use changes, driving forces of urban development, and implications for future sustainable development, makes the book an important reference for various related studies.

The Politics of Urban Land in South Asia Urmi Sengupta, Kenneth Nielsen, 2025-03-18 Cities in South Asia are homes to one of the highest concentrations of people anywhere in the world and the allocation of land and urban resources and the benefits that can be derived from them in this region have become increasingly contested. This book explores the politics of urban land in South Asia and the challenges related to their respective urban futures. For most people, land comes at a premium, and as a result conflicts and contestations over land and urban resources are rife in countries such as India, Bangladesh, Pakistan, Sri Lanka and Nepal, as witnessed in the many struggles of low-income groups and vulnerable or marginalised communities to fight off dispossession or displacement. This book maps current challenges shared across national borders and charts out new directions for future research and land policy. With contributions from emerging and established authors, the book offers a critical accounting of the situation that exists in urban South Asia, while also critically engaging with the current challenges and future directions for land use and land politics. The book will be useful to students and researchers of public policy, development studies, economics, urban and regional development studies, and sociology as well as to policy makers, real estate professionals, and commercial firms engaged in property market/real estate study in Asia. Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons [Attribution-Non Commercial-No Derivatives CC-BY-NC-ND 4.0 license].

Urban Space: experiences and Reflections from the Global South Hernández García, Jaime, Cárdenas-O'Byrne, Sabina, García Jerez, Adolfo, BB Beza, 2018-12-14 The structuring of Urban Space is as topical as ever in this era of climate change, hyper-urbanisation, post-digital labour markets, and geo-political power shifts. Scholarship of the contemporary urban condition is dominated by studies and examples drawn from the global north. Yet, cities of the global south are distinctive from those of the global north. Socio-political conditions structure patterns and practices of urban reproduction and, in turn, Urban Space reflects conditions in the Global South. The result is different space related outcomes. This is the central topic of this collection. In this book, a unique collection of case study-based accounts posits both English and Spanish academic literature to interpret and reinterpret the appropriation, negotiation and reconfiguration of Urban Space in cities, from Colombia to Namibia. This collection will be of particular interest to urban scholars and others interested in contemporary urban change, especially those with an interest in the Global South. Readers will encounter new perspectives on the State's enduring influence in urban land and territory reconfiguration and the contrasting wider rhetoric that affords and legitimises a key role for the private sector. The case studies also illuminate opportunities and possibilities for grassroots organising to challenge prevailing city actor hierarchies. They also highlight the political-economic consequences of particular cases of bus rapid transport projects for spatial and social segregation. Across these and other topics, recurring themes of inequality, governance, and environment are investigated in contested urban terrains. The result is a unique collection of viewpoints, with a common, critical narrative on the present and future challenges facing cities of the Global

South.

Urban Disaster Resilience and Security Alexander Fekete, Frank Fiedrich, 2017-12-04 This edited book investigates the interrelations of disaster impacts, resilience and security in an urban context. Urban as a term captures megacities, cities, and generally, human settlements, that are characterised by concentration of quantifiable and non-quantifiable subjects, objects and value attributions to them. The scope is to narrow down resilience from an all-encompassing concept to applied ways of scientifically attempting to 'measure' this type of disaster related resilience. 28 chapters in this book reflect opportunities and doubts of the disaster risk science community regarding this 'measurability'. Therefore, examples utilising both quantitative and qualitative approaches are juxtaposed. This book concentrates on features that are distinct characteristics of resilience, how they can be measured and in what sense they are different to vulnerability and risk parameters. Case studies in 11 countries either use a hypothetical pre-event estimation of resilience or are addressing a 'revealed resilience' evident and documented after an event. Such information can be helpful to identify benchmarks or margins of impact magnitudes and related recovery times, volumes and qualities of affected populations and infrastructure.

AUC 2019 Le Thi Thu Huong, George M. Pomeroy, 2020-10-13 This book presents selected articles from the 15th International Asian Urbanization Conference, held in Ho Chi Minh City, Vietnam, on November 27-30, 2019. Bringing together researchers and professionals in the area of urban planning and development to better understand the growing need for sustainable urban life, it covers topics such as climate change and urban resilience; inclusive and implementable urban governance; smart and green mobility; transformations in land management; livable and smart cities; integrated planning and development; urban slums and affordable housing; sustainable urban finance; and urban renewal and redevelopment.

Handbook of Urban Health Sandro Galea, David Vlahov, 2006-10-12 As more people worldwide live in cities, increasingly we need to understand how cities and city living affect population health. Does city living negatively affect health? Conversely, can city living enhance population health and well-being? Over forty experts from around the world bring a depth of ideas to the Handbook of Urban Health, making the Handbook a focused resource for a range of health disciplines. The Handbook presents: (1) A discussion of the health of specific urban populations, among them immigrants, children, the elderly, racial and sexual minorities, the homeless, and the poor. (2) Methods relevant to the study of urban health including epidemiology, research methods, funding and policy issues, urban planning. (3) Practical issues for developing healthy cities including interventions, preventive strategies, providing health services, and teaching urban health. (4) International perspectives from developing countries and the World Health Organization. (5) Integrative chapters that conclude each of the book's sections, bringing together theoretical models with the big picture. A unique professional idea book, research resource, and teaching text, the Handbook of Urban Health challenges readers to consider the role that cities play in shaping

population health and to generate solutions that can make cities healthier places for all those who live there.

Informality and the City Gregory Marinic, Pablo Meninato, 2022-10-03 This book advances the agenda of informality as a transnational phenomenon, recognizing that contemporary urban and regional challenges need to be addressed at both local and global levels. This project may be considered a call for action. Its urgency derives from the impact of the pandemic combined with the effects of climate change in informal settlements around the world. While the notion of “the informal” is usually associated with the analysis and interventions in informal settlements, this book expands the concept of informality to acknowledge its interdisciplinary parameters. The book is geographically organized into five sections. The first part provides a conceptual overview of the notion of “the informal,” serving as an introduction and reflection on the subject. The following sections are dedicated to the principal regions of the Global South—Latin America, US-Mexico Borderlands, Asia, and Africa—while considering the interconnections and correspondences between urbanism in the Global South and the Global North. This book offers a critical introduction to groundbreaking theories and design practices of informality in the built environment. It provides essential reading for scholars, professionals, and students in urban studies, architecture, city planning, urban geography, sociology, anthropology, cultural studies, economics, and the arts. As a critical survey of informality, the book examines history, theory, and production across a range of informal practices and phenomena in urbanism, architecture, activism, and participatory design. Authored by a diverse and international cohort of leading educators, theorists, and practitioners, 45 chapters refine and expand the discourse surrounding informal cities.

Solid Waste Management in Nepal Asian Development Bank, 2013-08-01 Managing solid waste is one of the major challenges in urbanization. A survey conducted in all 58 municipalities of Nepal in 2012 found that the average municipal solid waste generation was 317 grams per capita per day. This translates into 1,435 tons per day or 524,000 tons per year of municipal solid waste generation in Nepal. Many of these technically and financially constrained municipalities are still practicing roadside waste pickup from open piles and open dumping, creating major health risks.

Economics of Urban Externalities Shiva Raj Adhikari, 2016-02-26 This book provides a fresh look at measuring negative externalities in the urbanization process. Meeting the challenges that come hand-in-hand with the contemporary age of rapid urbanization demands more extensive empirical knowledge. While most urbanization research focuses on positive externalities, this book is designed to offer insights into possible sources of negative externalities and the measurement thereof. In economics, the measurement of externalities is a challenging task that demands innovative research designs; however, previous research has failed to capture all of these externalities. The technique described in this book is carefully designed to measure negative externalities, particularly those related to squatter settlements that have been hitherto largely ignored by urbanization literature. The existence of negative externalities and the unintended consequences of rapid urbanization, particularly those related to squatter settlements, can be found in Latin America and Asia. This book provides

comparative insights based on extensive primary surveys of households in squatter and non-squatter settlements of Kathmandu, Nepal and Quito, Ecuador. It is considered a case study that will improve the understanding of urbanization issues between Latin America and Asia. Societal benefits can be improved through the reduction of negative externalities. This book helps policy makers in Kathmandu and Quito fine-tune their policies to address the source of urban externality, as well as provide new insights into the nexus between urbanization and development. An investment in the reduction of negative externalities is profitable, thus presenting the government and international partners with a great opportunity. This book contributes to existing literature and will be useful for researchers and students.

Water Management: A View from Multidisciplinary Perspectives G. M. Tarekul Islam, Shampa, Ahmed Ishtiaque Amin Chowdhury, 2022-03-25 This book brings together a selection of best papers from The International Conference on Water and Flood Management, Bangladesh, 2021. The book chapters are based on contributions from multidisciplinary fields, such as nature-based solutions, hydro-meteorological forecasting, river restoration, coastal risk, episodic natural hazards, water risk and resilience, climate-resilient infrastructure, blue economy, and water management during the COVID-19 pandemic. With changing physical and socioeconomic risks due to changes in climate and anthropogenic interventions, integrated approaches to analyzing these processes and their interactions, along with integrating nature-based solutions, are gaining traction. With this special focus on science, policy, and practice to ensure sustainability in the water sector, the conference provided a platform for researchers, policymakers, and practitioners to exchange their knowledge and experience.

Handbook of Research on Urban Governance and Management in the Developing World Mugambwa, Joshua, Katusiimeh, Mesharch W., 2018-05-09 With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The Handbook of Research on Urban Governance and Management in the Developing World is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations.

Environmental Change and its Implications for Population Migration Jon D. Unruh, Maarten Krol, N. Klot, 2008-01-18 This volume provides an ample overview of state-of-the-art understanding of the multi-dimensional phenomenon of migration, in the characterisation of migration drivers, in environmental and agro-economic case studies and modelling issues as well as socio-political analyses. The analysis is geared to the consequences of climatic change, and the effects on soil, water and extreme weather that will drive populations to migrate.

GIS in Sustainable Urban Planning and Management Martin van Maarseveen,Javier Martinez,Johannes

Flacke,2018-12-07 The Open Access version of this book, available at

<http://www.tandfebooks.com/doi/view/10.1201/9781315146638>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. GIS is used today to better understand and solve urban problems. GIS in Sustainable Urban Planning and Management: A Global Perspective, explores and illustrates the capacity that geo-information and GIS have to inform practitioners and other participants in the processes of the planning and management of urban regions. The first part of the book addresses the concept of sustainable urban development, its different frameworks, the many ways of measuring sustainability, and its value in the urban policy arena. The second part discusses how urban planning can shape our cities, examines various spatial configurations of cities, the spread of activities, and the demands placed on different functions to achieve strategic objective. It further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change. Written by authors with expertise on the applications of geo-information in urban management, this book showcases the importance of GIS in better understanding current urban challenges and provides new insights on how to apply GIS in urban planning. It illustrates through real world cases the use of GIS in analyzing and evaluating the position of disadvantaged groups and areas in cities and provides clear examples of applied GIS in urban sustainability and urban resilience. The idea of sustainable development is still very much central in the new development agenda of the United Nations, and in that sense, it is of particular importance for students from both the Global South and Global North. Professionals, researchers, and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management.

Disaster Management C.A. Brebbia,2018-01-30 Recent major earthquakes, tsunamis, hurricanes, floods and other natural phenomena have resulted in huge losses in terms of human life and property destruction. A new range of human-made disasters have afflicted humanity in modern times; terrorist activities have been added to more classical disasters such as those due to the failure of industrial installations. It is important to understand the nature of these global risks to be able to develop strategies to prepare for these events and plan effective responses in terms of disaster management and the associated human health impacts. The selected papers contained in this book have been written by academics and professionals and represent some of the latest developments in the field.

Historical Dictionary of Nepal Nanda R. Shrestha,Keshav Bhattarai,2017-02-08 Nepal is a living example of contrasts and contradictions.It is a country that was born in medieval times, grew up in the 16th century, and now finds itself engulfed in the high-tech gadgets and material marvels of the 21st century. Nepal has its share of problem which include inadequate economic development and social infrastructure, poverty and corruption, plus worsening pollution, but now it finally has relative peace and quiet after a hasty Maoist uprising. Indeed, it has passed through several democratic elections, and finally

seems to be getting on the right track. This second edition of Historical Dictionary of Nepal contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Nepal.

Hyogo Framework for Action and Urban Disaster Resilience Yuki Matsuoka, Rajib Shaw, 2014-09-04 In a world which continues to experience dramatic suffering as a result of natural hazards, local level disaster risk reduction efforts are of increasing importance. With reference to examples in the Philippines, this book analyses a local disaster risk resilience approach and suggests an effective model for enhancing such efforts in the future.
