Sacred Time and the Search for Meaning Gary Eberle, 2002-12-24 In *Sacred Time and the Search for Meaning*, author Gary Eberle contemplates how humans' view of time has evolved throughout history, how we came to measure time, and why we feel especially starved for it now. Eberle seeks to rediscover a renewed sense of meaning in life through looking for ways to enter the realm of sacred time or sabbath time—where we can reconnect with the slower, deeper rhythms of life that have traditionally been experienced through worship, prayer, and the observance of holy days. Drawing from the work of Western philosophers from Aristotle to Heidegger, and on theorists from Jung to Foucault, he presents both an intellectual history of time and a personal account of his own search for sacred time. Along the way he formulates an insightful analysis of our culture's obsession with speed and efficiency, and he offers guidance for slowing down to savor life outside of schedules and routines, showing the way toward finding fulfillment in this increasingly accelerated world.

Theory and Application of Diagrams Michael Anderson, Peter Cheng, Volker Haarslev, 2003-07-31 Diagrams 2000 is dedicated to the memory of Jon Barwise. Diagrams 2000 was the first event in a new interdisciplinary conference series on the Theory and Application of Diagrams. It was held at the University of Edinburgh, Scotland, September 1-3, 2000. Driven by the pervasiveness of diagrams in human communication and by the increasing availability of graphical environments in computerized work, the study of diagrammatic notations is emerging as a research field in its own right. This development has simultaneously taken place in several scientific disciplines, including, amongst others: cognitive science, artificial intelligence, and computer science. Consequently, a number of different workshop series on this topic have been successfully organized during the last few years: Thinking with Diagrams, Theory of Visual Languages, Reasoning with Diagrammatic Representations, and Formalizing Reasoning with Visual and Diagrammatic Representations. Diagrams are simultaneously complex cognitive phenomena and sophisticated computational artifacts. So, to be successful and relevant the study of diagrams must as a whole be interdisciplinary in nature. Thus, the workshop series mentioned above decided to merge into

Diagrams 2000, as the single - terdisciplinary conference for this exciting new ?eld. It is intended that Diagrams 2000 should become the premier international conference series in this area and provide a forum with su?cient breadth of scope to encompass researchers from all academic areas who are studying the nature of diagrammatic representations and their use by humans and in machines.
