Wildland Fire Danger Estimation and Mapping Emilio Chuvieco, 2003 The book presents a wide range of techniques for extracting information from satellite remote sensing images in forest fire danger assessment. It covers the main concepts involved in fire danger rating, and analyses the inputs derived from remotely sensed data for mapping fire danger at both the local and global scale. The questions addressed concern the estimation of fuel moisture content, the description of fuel structural properties, the estimation of meteorological danger indices, the analysis of human factors associated with fire ignition, and the integration of different risk factors in a geographic information system for fire danger management.

La evaluación del impacto ambiental de proyectos y actividades agroforestales Manuela Andrés Abellán, Francisco Antonio García Morote, 2006-11-03 Este libro es un intento de abordar el procedimiento de Evaluación de Impacto Ambiental (E.I.A.) de proyectos y actividades con repercusión en el medio rural, desde todos sus diferentes aspectos. En él se aúnan los fundamentos científicos y técnicos básicos del proceso, las herramientas aplicables a los Estudios de Impacto Ambiental y la normativa vigente en materia de Evaluación de Impacto Ambiental, con el seguimiento y desarrollo de casos prácticos referidos a proyectos y actividades en el medio agrario e industrias agroalimentarias. Además también se hace una breve introducción de la Evaluación Ambiental estratégica (E.A.E.) de planes y programas, destacando los planes de ordenación de territorio.

Recent Advances and Applications in Remote Sensing Ming Hung, Yi-Hwa Wu, 2018-07-25 Remote sensing was the primary data source since the launch of the first environmental monitoring satellite back in 1972. In the past five decades, remote sensing technology has come a long way and evolved into a mature science. Even so, new technologies, new theories, new methodologies, and new applications continue to emerge. With the rapid pace of technological advancement, it is essential to share experiences especially between different disciplines, either on breakthroughs in new theory or understanding, or applications of remote sensing on real world issues. Disciplines or fields covered in this book include geography, geology, agriculture, forestry, botany, and oceanography. Though remote sensing may be used differently in various disciplines, the principles are similar, if not the same. This book will be valuable to scientists, scholars, working professionals, or students who use remote sensing in their work, and are interested in learning how others use remote sensing in different ways.

Grasslands , 2024-06-05 Welcome to the edited volume Grasslands - Conservation and Development, a unique and interesting exploration unveiling the delicate interplay of conservation and development of grasslands, which are the Earth's most strategic ecosystem. The inspiration behind compiling this edited volume lies in the recognition that grasslands are beyond open fields on the Earth's surface, encompassing intricate systems that bridge the functions of human societies and natural ecosystems. From the iconic and diverse prairies of North America to the vast savannas of Africa to the diversified

steppes of Eurasia, grasslands tend to be shaped by both human endeavor and the forces of nature. This book presents research works about imparting resilience to grasslands through effective conservation and novel development initiatives. This edited volume showcases the efficacy and dynamic feasibilities that emerge when grassland conservation and development strategies work hand in hand for the greater benefit of ecosystems, grass species, and human beings. This book is not just an exploration but it is also a call to action. After examining the challenges and eco-biologically viable strategies documented in this book, each and every person must consider their role in the journey towards embracing grassland conservation and development. This book is an invitation to all stakeholders, including researchers, environmentalists, policymakers, students, and ranchers, who have a passion for shaping the sustainable conservation, restoration, and development of grasslands.

CUADERNO URBANO 23 - ESPACIO, CULTURA, SOCIEDAD Eudene,2021-08-12 CUADERNO URBANO es una publicación científica con arbitraje internacional dirigida a la difusión de artículos y ensayos que se ocupan desde las disciplinas científicas a la cuestión urbana -en el sentido más amplio del término-, combinando trabajos de caracteres empíricos, teóricos y ensayísticos que den cuenta de problemáticas locales, regionales y universales. La intención de la publicación es favorecer y promover la generación de ensayos y artículos de jóvenes investigadores con las reglas del arbitraje científico, colaborando en la producción editorial de sus ideas, como también divulgar el aporte de científicos ya consagrados en su especialidad disciplinar. Luego de la crisis social y económica del año 2001, el sector de la construcción experimentó un fuerte crecimiento en la ciudad de Buenos Aires, impulsado fundamentalmente por la construcción de vivienda destinada al mercado inmobiliario. En este artículo se investigará la dinámica de la oferta de vivienda nueva a partir del análisis de las características y las prácticas de los actores responsables de la construcción y comercialización de edificios residenciales en el barrio de Caballito entre 2003 y 2008. Se argumentará que la oferta de vivienda nueva no fue el producto de decisiones de individuos atomizados que buscan maximizar sus ganancias, sino más bien el resultado de las prácticas de promotores inmobiliarios que buscaban sobrevivir en el tiempo, reduciendo la incertidumbre sobre la base del establecimiento de vínculos estables con inversores
