Teoría y práctica de las competencias básicas José Moya Otero,Florencio Luengo Horcajo,Asociación Proyecto Atlántida,2011-03-02 Desde el convencimiento de que las competencias básicas pueden actuar como factor de mejora del currículo que los centros educativos ofrecen a su alumnado, los autores nos dan en este libro una respuesta constructiva articulando teorías y prácticas de tal modo que las competencias básicas puedan ser consideradas un factor de mejora, para desarrollar de manera sistemática sus consecuencias para la práctica educativa y para el currículo real de los centros.

Índices e indicadores sobre la calidad del agua Guillermo Calvo Brenes,2018-12-04 Las diferentes regiones del mundo enfrentan problemas asociados a la disponibilidad, uso y control del recurso agua. Su conservación y calidad están ineludiblemente vinculadas a las actividades económicas y sociales, así como a la salud de la población. El incremento de los agentes contaminantes en las aguas es cada vez mayor debido a las actividades antropogénicas. Cada año se registran más de 1000 nuevos contaminantes en las aguas como consecuencia de la actividad industrial. La determinación de la calidad del agua usualmente conlleva el análisis de una cantidad grande de indicadores de calidad, lo cual dificulta el análisis. Por otra parte, es posible el empleo de índices cuya peculiaridad es la simplificación de una gran cantidad de información en un único valor. Esa facultad de los índices es lo que los ha hecho un medio eficiente para comunicar información. En este libro se presenta una investigación exhaustiva de los distintos indicadores e índices de calidad del recurso hídrico que se utilizan a nivel mundial. Se incluyen aspectos cualitativos y cuantitativos involucrados en el cálculo de los índices. Asimismo, la metodología para que índices elaborados en otros países con diferentes condiciones ambientales y de legislación puedan ser ajustados y aplicados en otras regiones.

Organismos indicadores de la calidad del agua y de la contaminación (bioindicadores) Guadalupe de la Lanza-Espino,Salvador Hernández Pulido,2000-01-01 El deterioro obvio de los ambientes acuáticos, tanto dulces (ríos, lagos y embalses) como costeros (lagunas, estuarios, bahías, marismas), es resultado de los cambios provocados por las diversas

actividades antropogénicas, teniendo como consecuencia que la calidad del agua que sostiene a una gran variedad de organismos se haya visto alterada en diverso grado. Bajo este panorama algunos organismos acuáticos pueden resistir adaptándose a condiciones deletereas definiendo así al ambiente, u otros desaparecer por no soportar condiciones de impacto. De esta manera surge la necesidad de proponer aquellos organismos que caractericen condiciones particulares, para ser usados como indicadores de la calidad del agua, como una herramienta incluso, para generalizarse en el monitoreo del preciado líquido. El deterioro obvio de los ambientes acuáticos, tanto dulces (ríos, lagos y embalses) como costeros (lagunas, estuarios, bahías, marismas), es resultado de los cambios provocados por las diversas actividades antropogénicas, teniendo como consecuencia que la calidad del agua que sostiene a una gran variedad de organismos se haya visto alterada en diverso grado. Bajo este panorama algunos organismos acuáticos pueden resistir adaptándose a condiciones deletereas definiendo así al ambiente, u otros desaparecer por no soportar condiciones de impacto. De esta manera surge la necesidad de proponer aquellos organismos que caractericen condiciones particulares, para ser usados como indicadores de la calidad del agua, como una herramienta incluso, para generalizarse en el monitoreo del preciado líquido. La presente obra es una aportación primigenia que comprendía bibliográficamente aquella información nacional de fitoplancton, algas, peces, crustáceos, moluscos, insectos y parásitos con posibilidades de ser usados como indicadores (bioindicadores) de la calidad del agua. Estos grupos, presentados como capítulos, contienen nombres científicos de los organismos, en ciertos casos el vulgar, sus características morfológicas junto con una figura o fotografía para identificación en campo, su hábitat, su distribución nacional o regional y a qué tipo de ambiente caracteriza. En esta obra se podrán observar los primeros esfuerzos de rescatar material informativo de diversas fuentes para proponer a los interesados aquellos elementos biológicos que aún podemos disponer para la evaluación ambiental: con el temor de que algunos otros ya hayan desaparecido por el impacto ambiental.
