Rossignoli,Mario Pezzillo Iacono,2014-07-15 This book explores the diversity of topics, views and perspectives focused on the relationship between information systems, organizations and managerial control. It brings together theories and practices by a diverse group of scholars working in different disciplines: organization, management, accounting, information systems development, human-computer interaction. The volume is divided into three sections, each one focusing on a specific theme: organizational change, innovation and information and communication technologies; organizational control, accounting and information systems; information, knowledge and project management practices. Politiche di mobilità sostenibile: il progetto "VerySoon" dell'Università della Campania Luigi Vanvitelli Armando Cartenì,2019-05-15 Le Università italiane sono spesso localizzate in aree territoriali a bassa accessibilità trasportistica per le quali spesso risultano insufficienti i servizi di trasporto collettivo per gli studenti. A partire da questa considerazione nasce il progetto di mobilità VerySoon dell'Università della Campania Luigi Vanvitelli finalizzato a migliorare l'offerta di trasporto per gli studenti, incentivando l'utilizzo di modalità di trasporto sostenibili come la mobilità dolce ed il carpooling. Lo strumento sviluppato per perseguire queste finalità è stato un sistema integrato di servizi di trasporto gratuiti e fruibili tramite un'unica piattaforma dedicata ed esclusiva (App per smartphone e sito web dedicato). Il presente testo ripercorre tutte le fasi del progetto VerySoon dalla sua ideazione sino al monitoraggio ex-post. Al lettore viene proposta un nuovo processo di pianificazione basato sull'uso congiunto di metodi quantitativi, dello stakeholder engagement e delle buone pratiche della teoria del nudge.

Preventing Corporate Corruption Stefano Manacorda,Francesco Centonze,Gabrio Forti,2014-04-28 This book presents the results of a two-year international research project conducted for the United Nations Office on Drugs and Crime (UNDOC) to investigate and provide solutions for reducing bribery and corruption in corporations and institutions. It starts

with an empirical case study on the effectiveness of a set of self-regulation rules adopted by multinational companies in the energy sector. Second, it explores the context and factors leading to corruption internationally (and the relationships between domestic criminal law and self-regulation). Third, it examines guidelines for the adoption of compliance programs developed by international institutions, to serve as models for the future. The principle result of the book is a three-pronged Anti-Bribery Corruption Model (so called ABC Model), endorsed by the United Nations, intended as a corruption prevention tool intended to be adopted by private corporations. This work provides a common, research-based standard for anti-bribery compliance programs, with international applications. This work will be of interest to researchers studying Criminology and Criminal Justice, particularly in the areas of organized crime and corruption, as well as related areas like Business Ethics and Comparative International Law.
