Free Market Missionaries Sharon Beder, 2012-06-25 In her recent book *Suiting Themselves*, bestselling author Sharon Beder exposed how the global corporate elite have brazenly rewritten the rules of the global economy to line their pockets. In this new book she trains her sights on the insidious underbelly of this global trend to show how they have also orchestrated a mass propaganda campaign to manipulate community values and convince us that their interest - co-opting and controlling all of us in the name of the free market - is in our interest. During the 20th century, business associations coordinated mass propaganda campaigns combining 20th century American PR methods with revitalized free market ideology from 18th century Europe. The aim was to persuade people to eschew their own power as workers and citizens, and forego their democratic power to restrain and regulate business activity. Sophisticated corporate-funded think tanks augmented these campaigns in the 1970s and 1980s, promoting free enterprise and business-friendly policies. These free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns. In each case the goal is the same: the triumph of business values over community values. Beder's is an intellectual call to arms: challenge the ideology of the free market missionaries or be converted to it.

Mobile Technologies in Libraries Ben Rawlins, 2016-09-08 The ever expanding usage of mobile technologies has dramatically changed how we access information and how we as a society expect to access information. With mobile technologies becoming available to an increasing majority of the population, users are constantly connected to information. The rapid expansion of mobile technology has had a profound impact on many different sectors, industries, and institutions,

among those that have been affected are libraries. With more users expecting access to information and resources in a mobile optimized format, libraries have had to adapt to meet the needs of users. This has entailed evaluating various library services and resources to determine how to best meet the needs of mobile users. Additionally, mobile technology has changed the way that websites are designed, and has led to an increasing popular type of web design known as responsive web design (RWD). This enables web developers to design websites with one code base that are optimized for a wide range of devices from desktop computers to smartphones. Libraries must keep their mobile services current or risk becoming obsolete. Based on research, examples, and experience using mobile technology, this book will include topics such as: The impact of mobile technology, Mobile technology and the Digital Divide, Implications for library staff and vendors, Responsive Web Design, Wearable technology in library services. *Mobile Technologies in Libraries: A LITA Guide* is written for library staff interested in how mobile technologies have changed the way we access, and expect to access, information, as well as how libraries can incorporate and adapt to mobile technology.

Crisis Communications Kathleen Fearn-Banks, Kevin Kawamoto, 2024-06-20 Now in its sixth edition, this book provides engaging, practice-oriented case studies analyzing communication professionals' crisis preparation and responses, illustrating key considerations for communicating with both internal and external stakeholders during and after a crisis. This edition continues its strength as a student-friendly text that demonstrates how to craft, target, and deliver messages during crises in order to mitigate further controversy and distress. Classic cases lay the foundation, while contemporary cases shed light on cutting-edge practices in use today. Many cases from previous editions have been updated and new cases added, including the COVID-19 crisis and U.S. vaccination campaign; Starbucks and racial discrimination at a Philadelphia branch; Will Smith and the Academy Awards slap; Gander, Newfoundland in supporting stranded tourists after the attacks of September 11, 2001; and a look at how schools can prepare communication responses to school shootings. Each case pays particular attention to the actual and ideal use of social media in the crisis and there is a new section on the important issues of misinformation and disinformation. *Crisis Communications, 6th Edition* is intended for courses in crisis communication, crisis management, disaster response, corporate communications, and public relations. Student and instructor online support materials feature selected previous editions' case studies no longer in this edition as well as an Instructor's Manual with suggested activities, discussion questions, and sample quizzes: www.routledge.com/9780367894450.

Web Corpus Construction Roland Schäfer, Felix Bildhauer, 2022-05-31 The World Wide Web constitutes the largest existing source of texts written in a great variety of languages. A feasible and sound way of exploiting this data for linguistic research is to compile a static corpus for a given language. There are several advantages of this approach: (i) Working with such corpora obviates the problems encountered when using Internet search engines in quantitative linguistic research (such as non-transparent ranking algorithms). (ii) Creating a corpus from web data is virtually free. (iii) The size of corpora compiled from the WWW may exceed by several orders of magnitudes the size of language resources offered elsewhere. (iv) The data is locally available to the user, and it can be linguistically post-processed and queried with the tools preferred by her/him. This book addresses the main practical tasks in the creation of web corpora up to giga-token size. Among these tasks are the sampling process (i.e., web crawling) and the usual cleanups including boilerplate removal and removal of duplicated content. Linguistic processing and problems with linguistic processing coming from the different kinds of noise in web corpora are also covered. Finally, the authors show how web corpora can be evaluated and compared to other corpora (such as traditionally compiled corpora). For additional material please visit the companion website:

Technology-Enabled Learning and Design Methodologies Andrea Filatro, Carolina Costa Cavalcanti, 2024-12-30 Technology-Enabled Learning and Design Methodologies offers a comprehensive and example-rich guide to the latest technological and methodological advancements in education. This book systematically organizes a rich variety of educational innovations into four distinct groups of teaching-learning methodologies, each with its own focus and disruptive potential: · Creative methodologies, centered on student protagonism and creativity, which shift the traditional roles in the teaching-learning process, empowering students to take an active, leading role in their education and encouraging creative thinking and expression. · Agile methodologies, focused on time management and adaptability, which optimize students' time and attention through microlearning and other bite-sized content, activities, and assessments. · Immersive methodologies, driven by simulated real-world scenarios, which blur the boundaries between learning environments and real-life contexts in order to immerse learners in challenging, story-driven environments linked to clear learning objectives. · Analytical methodologies, based on computation power, which support personalized, adaptive, and evidence-based teaching and learning by collecting and processing student data. Through a practical, dialogical approach, filled with visual resources and real-world examples, the authors provide solid theoretical foundations for their methodologies of focus, positioning them within a broader spectrum that goes beyond mere consumption of isolated techniques or technologies. This will be a relevant

resource for current and aspiring instructional designers, educational technologists, subject matter experts, teaching faculty, researchers, and other stakeholders involved in face-to-face, distance, or hybrid education.
