web oct 30 2022 there are two basic types of acid base

titrations indicator and potentiometric in an indicator based  
titration you add another chemical that changes color at the  
ph equal to the equivalence point when the acid and base are  
in

web strong acids and strong bases completely ionize in  
solution resulting in water and a salt for a weak acid there s  
only partial ionization the titration curve of a strong base  
strong acid showed a stretched out curve as it started with a  
slow gradual change in ph as it reached the equivalence  
point
